## BABY CARE CRADLE

Enviro-LCS™ baby care cradles are designed with the busy parent in mind enabling a quick, safe means of changing babies nappies when not at home. Features include: concave bed, safety strap keeps baby secure, the cradle is reinforced by steel rods offering stability and support, low profile, round edges, built in hook holds shopping bag or purse, also included is a built in shelf for placing personal baby changing items while attending to baby, while dispenser pockets hold liners.

Manufactured of high density polyethylene the Enviro-LCS™ baby care cradle eliminates absorption of moisture or odours. Unique side opening allows the cradle to be installed in small areas and is safer than front opening models as the baby cannot roll to the side. Enviro-LCS™ baby care cradles are the obvious choice at changing time. The Enviro-LCS™ baby care cradle combined with our nappy disposal service completes our baby care system.
