ULTRAVIOLET AIR PURIFIER

Natural air purification is difficult in modern high-density cities. We live in close proximity to each other, allowing airborne bacteria to travel from person to person; the problem is increased in air-conditioned offices.

The effect can be seen where one person becomes ill and within days has transmitted the infection to other staff members resulting in absenteeism.

Ultraviolet light destroys bacteria and mould; they do not build up an immunity to ultraviolet like they do to the chemicals and sprays. The ultraviolet lamp covers an average size room for adequate protection. Enviro-LCS™ manufactures a range of units suitable for commercial or home use.

OPTIONS: Fully serviced, hire and you service, or purchase.

SERVICE FREQUENCY AVAILABLE:

Quarterly, half yearly, yearly.

OTHER RECOMMENDED PRODUCTS AND SERVICES:

Urinal and WC Deepclean.

FURTHER INFORMATION: For further information regarding any of our washroom products, contact Enviro-LCS™ on (02) 9310 1400, or visit our website at www.enviro-lcs.com.au.
